

## In the Specification

Please amend the Specification as follows:

Please amend the paragraph beginning on Page 19, line 7 as follows:

Turning to Figure 1, shown therein is an illustrative view of the present invention 10. Shown is a wall 18 ~~mounted to which is mounted~~ a surgical tape dispenser 12 providing means for holding multiple rolls of tape 14 and having an anti contamination dust cover 16 for accessing tape or changing tape rolls.

Please amend the paragraph beginning on Page 19, line 10 as follows:

Turning to Figure 2, shown therein is a perspective view of the present invention 10. Shown is the present invention 10 comprised of a housing ~~28 30~~ made of rigid material and ~~having means for supporting~~ able to receive a plurality of tape rolls 14 ~~on including~~ spindles 26 ~~with and having~~ multiple serrated members 20 or cutting edges for shearing small or large amounts or pieces of tape from ~~the master roll~~ respective tape rolls 14. Also shown are dust cover 16 mounted pivotally at pivot point ~~20~~ 22 on one end with a locking element at ~~22~~ 24 on the other end. The housing includes top and bottom opposing ends 38 and 40, respectively, a front face 42 and a rear side 44. First and second opposing side walls 46 and 48, respectively, extend between the front face 42 and rear side. The first and second opposing side wall 46 and 48 each have a front edge 50 and 52, respectively. The rear side 44 includes a mounting surface and the front face is open. A cavity 54 is formed in the front face 42 and between the first and second opposing side walls 46 and 48 for receiving a plurality of rolls of tape 14 therein. A plurality of horizontal notches 56 are disposed on the front edge of each of walls. The notches 56 on the first and second opposing side walls are aligned with one another to form notch pairs.

Each notch pair are spaced apart along the side walls from each other. Each notch has a downwardly disposed groove in a rear of each notch for removably securing an article therein.

Please amend the paragraph beginning on Page 20, line 10 as follows:

Turning to Figure 4, shown therein is an exploded view of the present invention 10. Shown is the tape dispenser having a rigid multilevel tape roll support member with removable tape spindle 26 cores for holding a plurality of tape rolls 14. The dust cover 16 provides a contamination free environment for any type of tape including surgical tapes. Also shown are pivot 22, locking nub 24 and ~~spaces~~ spacers 32.
